

CLS DMX 16s Digital Light Mixer

DMX 16s has all the features of the DMX 16, in addition to a unique Sound Input. This input enables lighting controlled by sound!

DMX 16s features flash buttons for all channels, as well as a master flash. It is also equipped with a button for DMX channel 17, sending on/off signal e.g. for smoke machines.

4 scenes can be stored in the mixer. Choice of scene is selected using the flash buttons or with a Chaser function that enables automatic chase between the scenes, with configurable speed and fading.

Programming is done either through Easy Mode or Advanced Mode, depending on the user knowledge and user friendliness preferred. DMX 16s comes with 3 or 5 pin Neutrix XLR DMX output selectable.

Because of the compactness, this product is the light mixer of choice for many bands and musicians who spend time on the road.

Standard accessories included are Flight Case, Power Supply and Instructions on disk.
