

CLS DMX 16W Digital Light Mixer

The DMX 16W is a small 16 channel DMX light mixer designed for flush mounting, covering requirements for displays, shops, offices, etc.

This mixer can control dimmer, scanners, moving heads or other equipment capable of receiving DMX signals.

3 programs with 4 scenes each can be stored in the mixer, for selection using the four buttons on the panel. For instance can the user directly choose daytime settings, nighttime settings, full light and darkness.

This mixer also has some advanced functions like a chaser, with configurable fading time and tempo. This can automatically control moving lights or dimmers, and can be very helpful in drawing attention to e.g. a display.

The measurements are only 60 x 130 mm, and there are several colors to choose from.

DMX 16W comes with a power supply.
