

CLS DMX 425 Digital Dimmer

Another lightweight, extremely compact dimmer from CLS. The CLS DMX 425 is a digital dimmer based on the noiseless IGBT technology.

This dimmer can easily be mounted in trusses, stands, on wall, or wherever suited close to the lights. This ensures less cabling and easier and faster setup.

With maximum 500W per channel, this dimmer is ideally suited for Par 56 stage setups, but it is also ideal for other non stage purposes.

Protection level is extremely high, with electronic fuses for shortcuts, overload and high temperature.

DMX Configuration is the easiest ever, with CLS Easystore Start Channel selection. Just max out the desired start channel on your mixer and press the button on the unit to configure.

Specifications:

- 4x500W - Total max load: 10A
- New noiseless IGBT technology
