Professional DMX Replay Unit

X-RC 100

Automatic DMX unit records and replays lighting sequences including moving light operation.

- *Exact, 100%, record and replay of complex lighting movements and lighting sequences.*
- *All shapes, like circles and loops, will replay exactly.*
- *4 different DMX sequences can be selected through memory buttons.*
- *DMX sequences recorded by professionals can be replayed by anyone just by pressing a button.*
- *Use the X-RC as a backup device that analyze and takeover the DMX signal in the event of control panel failure.*
- *The X-RC can be controlled with DMX signal or interfaced through 6 of it's other external contacts.*
- *Can be connected to a timer.*
- *Keyboard lock function.*

The X-RC DMX data from the lighting control desk will be compressed. Replay exactly what's recorded. Complex moving light sequences can be played by anyone just by pressing a button.

Simple

The X-RC by SWISSON records and replays the exact DMX signal from the lighting control desk. In the event of an emergency the X-RC will take over if there is any lighting desk failure.

Stands Alone

The X-RC, can start and end sequences automatically and has the option of being used with a timer. Once started the selected sequence will repeat infinitely until turned off. A conventional timer can be connected.

Moving Light

Lamp Strike and cut off operation of moving light can be controlled with special startup and shutdown sequences. Complex movements, colors, and other optical effects will be replayed exactly.

Backup

The X-RC Black Box watches over the DMX signal of the lighting control desk. In case of failure the X-RC will take over the DMX signal. A built in PC connector allows software updates so the X-RC can be updated new features in future at www.swisson.com.

Flexible

The X-RC from SWISSON can be used with a wide range of applications. It can function as a replay unit in exhibits, Theaters, Churches, shops, Architectural lighting or as a backup unit in live shows and/or events. The X-RC is a must for lighting professionals.

Economic

Our experience in DMX control, development and recording allows us to create an excellent device at a great price.

Technical Data

Number of sequences.....4 + Startup + Shutdown
